

Academic Word List

An Introduction to the Academic Word List

Averil Coxhead, Massey University, New Zealand

What is the Academic Word List?

The Academic Word List (AWL) is a list of 570 word families that are commonly found in academic texts. This list was selected by examining a large corpus (or collection) of written academic texts and selecting the words that occurred:

- 1 In texts from all four academic faculty sections: Arts, Commerce, Law and Science.
- 2 Over 100 times in the corpus overall.
- 3 At least 10 times in each academic faculty section.
- 4 Outside the 2000 most frequent words on Michael West's *General Service List* (GSL). The GSL includes everyday words such as **I**, **house** and **do**.

These principles ensured that only words that occurred reasonably frequently in a variety of study areas were selected.

The AWL targets vocabulary that occurs most often in written academic texts. These words also occur in newspapers but not as often as they do in textbooks. The AWL words appear even less in fiction. If your focus is learning academic vocabulary, you need to make sure you read academic textbooks so that you encounter these words in context.

How is the AWL organized?

The AWL is organized into Word Families. Word families are made up of the 'parent word' and 'family members'. Take for example the word **maximise**. Its family members include inflections of the verb such as *maximised*, *maximises* and *maximising* as well as the noun *maximum*. The word family also includes the British spelling of the noun *maximisation*, as well as *maximization*, the US spelling.

If you learn the verb **maximise**, you will be able

to recognise other family members such as *maximised* when you encounter them in your reading. These words are closely related and the meaning is likely to be the same or similar. When you are looking for words in this dictionary, think about other word family members too.

Finally, there are some academic words that do not have a word family. These words occur on their own and do not have any inflections. Examples include **nonetheless**, **so-called** and **behalf**.

Why is the AWL important?

The AWL is intended as a reference for students who are studying or preparing to study at a tertiary level in English. As a university lecturer, I was aware of the difficulties that students had in mastering the vocabulary necessary for written assignments. The AWL does not include 'content' vocabulary for particular subjects which students obviously need to learn as well. The AWL focuses instead on the non-subject-specific vocabulary that students of any discipline will need to master in order to produce coherently-structured written assignments.

The AWL covers up to 10% of the vocabulary covered in written academic texts. This means that, on average, one word in 10 in an academic textbook is in the AWL. Look at the following extract from an academic text:

EUROPEAN ENVIRONMENTAL POLICY

Environmental issues are truly global. Many of the problems, like the **releasing** of CFCs into the atmosphere, have global effects and **require** global action. Some problems link to the **exploitation** of global commons – the **resources** shared by the **international community** such as *ocean beds* and *the atmosphere*. Sometimes small local problems, such as poisonous gases leaking from landfills and water pollution, are multiplied so many times in any local **contexts** that they become **major** world hazards. The **environment** is a global concern requiring global policies.

The highlighted words are all on the AWL. This sample illustrates clearly that the AWL can help with decisions about which words are important for you to learn if you are studying in an English-speaking country.

How can the AWL help me with my academic studies?

Knowledge of academic vocabulary is vital for students studying at an English-speaking university, particularly for reading and writing. If you compare estimates of how many words a native English speaker might know by the age of 18 (approximately 18,000 to 20,000 words) and how many a learner who has had two or three hours of schooling in English over several years (roughly 2000 to 3000 words depending on the language background of the student), this gap is enormous. In order to read and write successfully you need to be able to recognize as many words as possible in your textbooks and use as many as possible in your essays. The bigger your vocabulary, the more you will be able to cope with the high reading and writing demands of your studies.

Academic writing tends to be quite formal in style. The vocabulary items that you use in your writing can affect the level of formality. Writers need to know whether a word can be used in a particular situation. Take for example **consequent**. This is marked as *formal*. You would probably not choose to use this word when speaking with friends but you should use it in written English to take your language to a higher level of formality. The AWL will help you to focus on issues of formality. Look out for the formal label in this dictionary.

Remember that the AWL covers approximately 10% of all vocabulary in a piece of academic writing. You should aim to have roughly the same percentage in your own academic writing too. If you go to the **AWL highlighter website** by Sandra Haywood (http://www.nottingham.ac.uk/_alzsh3/acvocab/awlhighlighter.html) you can copy and paste your text into it and it will highlight the AWL words for you. This will enable you to see how many AWL words you are using overall and whether you repeat the same words many times in your writing.

When looking up words from the AWL in this dictionary you should also focus on the bold

phrases that are highlighted. These show you the key grammatical patterns and collocations for that word. Collocations are words that commonly occur together or near each other in a text, for example 'effect on'. Collocations and phrases are important because they help with fluency in writing and indicate that you are working at a higher level with academic vocabulary than just using a word from your own language and its translation. The collocations in the following text have been highlighted in **blue**.

DECLINING BIODIVERSITY

Whatever the **effects on** this planet's climate, rain-forest clearance **has** another undeniable **impact**. The **disappearance of** rain forests is a **major factor** eroding the earth's biodiversity, or, more simply causing many thousands of species of plant and animal life to disappear forever. While rain forests **account for** just seven percent of the **earth's surface**, they are **home to** almost half of this planet's living species. Estimates of the **total number** of species of animals and plants **range from** 1.5 million **to** as high as 30 million. Researchers, in fact, have identified more than 1,000 species of ants alone (Wilson, 1991).

What strategies can I use to help learn the AWL words?

Remember that building your vocabulary takes time. You are not likely to learn everything you need to know about a word the very first time you see it. And don't expect to remember everything about a word after looking it up in a dictionary once. Try some of these ideas to help you with vocabulary building:

- ➔ Make the most of the information given in this dictionary to build up your knowledge of a word. Look at the bold phrases highlighted in the entry. These show important grammatical patterns and collocations. Learn these rather than the word in isolation.
- ➔ Even if you think you already 'know' a word, look it up in the dictionary to see if there is any additional information that you don't know.
- ➔ Research has shown that repetition helps people to remember things. Make sure you build repetition into your learning. You could do this through using word cards to test yourself or by keeping a vocabulary notebook.

- ➔ Studying words 'actively' will help your learning. People do learn words through reading but the chances of remembering vocabulary is higher when you focus on the words and make a conscious effort to learn them.
- ➔ Look out for common collocations, phrases and grammatical patterns of words when you are reading academic texts.
- ➔ Work with the AWL alongside you when you are writing. Try to use words from the list that are relevant to your writing.

How is the AWL shown in this dictionary?

The words on the AWL are marked with **AC** in this dictionary.

The AWL does not include the 2000 most frequent words used in general everyday English. In this dictionary, however, the 3000 most frequent words in written English are also marked with **W1**, **W2** and **W3** and the 3000 most frequent words in spoken English are marked with **S1**, **S2** and **S3**. In some cases, these overlap with the AWL.
